Revenue (1935) Department.

MS SERIES.

G.O. No.	2047
DATED	30. 8. 35

[Despatch Abstract.]

Measures for the prevention of the silting up of the spring channel from the Hagari River in the Bellary district.

*434 *Q.*—Mr. A. RANGANATHA MUDALIYAR: Will the Hon. the Member for Revenue be pleased to state whether the spring channel from the Hagari River irrigating the wet fields of Rupanagudi village, Bellary taluk, Bellary district, is in imminent danger of being silted up with sand because of the destruction of the prickly-pear on its bank by the introduction of the cochineal insect and, if so, the measures proposed to be taken by the Government to keep the channel safe for irrigation purposes?

A.—There is no imminent danger of the spring channel referred to becoming silted up with sand.

This channel which takes off from the Hagari flows almost parallel to it for about 2½ miles, the distance between the river and the channel is about 3 or 4 furlongs. A chain of sand mounds has formed between them, the nearest being about a furlong from the channel. Some of these mounds were covered with prickly-pear, which has been destroyed. The Board of Revenue has been asked to instruct the Collector to examine whether casuarina or a creeper may not be planted to prevent the sand being blown into the channel.

Mr. A. RANGANATHA MUDALIYAR:—" Will the Hon. Member be pleased to state whether the Government have received any complaints from the ryots concerned, that their lands are being silted up with sand? "

The Hon. Mr. C. A. SOUTER:—" The only allegation that has so far been received is that the ryots are apprehensive that sand will be blown into the channel and to prevent it, the Government have taken action to see whether casuarina or a creeper may not be planted."

Mr. A. RANGANATHA MUDALIYAR:—" May I know whether that work is to be carried out by kudimaramat labour or otherwise? "

The Hon. Mr. C. A. SOUTER:—" That question has to be considered; it has not yet been considered."

Diwan Bahadur M. GOPALASWAMI MUDALIYAR:—" May I know if the Hon. Member is aware that as a matter of fact, nothing has been done at all in the matter? "

The Hon. Mr. C. A. SOUTER:—" This matter having been raised recently, we have had no time to do anything yet."

Board's M.1470/35-1 dated 7-3-35.

***

I forward herewith the report of the Tahsildar Bellary L.Dis.C.No.492/35 dated 13-3-35 (copy enclosed) showing the action taken by the Rupanagudi ryots to prevent the sand being blown into their channel. Though there is no imminent danger of the channel being affected by the shifting sands, the sand may be blown into the channel in a period of about 5 or 6 years and in order to prevent this it may be necessary to plant milk hedge plants or aloes along the sand banks as casuarina plantation is costly. The channel has an ayacut of 300.79 acres with an assessment of Rs.2193. Particulars of extent irrigated and the Revenue derived from the channel in faslis 1341, 1342, and 1343 are noted in the margin. The channel is under the control of the Revenue Department and its maintenance is in good condition. Some encouragement has to be given to ryots in the initial stage to prevent the danger referred to above, since there might be loss of revenue to Government if the channel gets silted up in course of time. This may be done by a

Fasli.	Extent irrigated.	Revenue derived.
1341	258-22 acres.	Rs.1611.2.11
1342	266-35 ,,	Rs.1587.3.11,
1343.	265.09 ,,	Rs.1584.10.11,

special grant alloted for the purpose on condition that the ayacutdars agree to their future maintenance as in the case of Berm cutting on channels under G.O.No.Press 412 Revenue dated 14/2/35.

Copy of Bellary Tahsildar's L.Dis.307/35 dated 2-3-35 to the Collector of Bellary.

Irrigation - Rupanagudi village - Spring channel from the Hagari river - Damages of - being silted up - planting of trees - report submitted.

Your C.No.211/35 dated 21-1-35.

The suggestion made by the Public Works Department has already been taken advantage of, and during the last year creepers known as "Camel foot" were planted along the sand hills. Casuarina plantation being a costly concern, the ryots could not agree to it. The ryots will gradually take to casuarina or aloe plantation to prevent the sand from blowing into the channel. Aloes need watering in the initial stage and as such may not be easy for the ryots. But milk hedge plant being hardy, the ryots want to try it next time. The ryots have understood the danger and have found it necessary to prevent the channel from being silted up. For the present the creeper plants appear to be the cheapest of all.

Resolution Reference.

Read the following:-

Letter from T. Bhaskara Rao Esq., I.C.S., Collector of Bellary, No. Ref. C. 2045/35-A2 dated 31st July 1935.-

Ref.- Board's Ref. No.M.1470/35-3, dated 18-6-35.

The Revenue Divisional Officer, Bellary has submitted an estimate for Rs.750/- for the growing of milk hedge plants to prevent the spring channel from being silted up with sand The estimate provides for the formation of two rows of milk hedge plants between the Hagari river and the sand mounds to obstruct sand drifts from the river and three rows between the sand mounds and the channel to prevent further drifts if any

...ing through the two rows referred to above. Each row consists of three lines at 1½' apart and each hedge in a line 1½' apart as shown in the enclosed sketch. The estimate has been returned to the Tahsildar for signature and return through the Revenue Divisional Officer with his counter-signature. It will be sanctioned during the current year if approved by Government and the work taken up for execution urgently as the plants thrive well during the rainy season.

REFERENCE.

Submitted to the Government in continuation of paragraph 2 of Board's Reference M.1470/35-2, dated 12th April 1938.

2. The Board supports the Collector's proposal to grow milk hedge plants at the cost of the Government initially for preventing the Hagari spring channel in Rupanagudi village from being silted up with sand, subject to the condition that the cultivators under the channel maintain the milk hedge plants in the future as a kudimaramat work. They have agreed to abide by this condition.

dispatch

The Government sanction an expenditure not exceeding Rs 750 for planting milk hedge plants between the Hagari river and the Rupanagudi spring channel in the Bellary district, to prevent the latter from being silted up into sand, subject to the condition that the ayacutdars under the channel maintain the plants

in the future under Kudimaramatta. An agreement embodying this condition should be taken from the ayacutdars before the work is commenced.
